Reference is made to the recent letter from the Permanent Secretary Ministry of Health Community Development Gender Elderly and Children Reference No DA. 246/262/01/57 dated 18th April 2020 to all Medical Officers in charge in the Regional Referral Hospitals in Tanzania directing that all health care workers who are currently in higher learning institutions in Tanzania to report back to their respective employers after suspension of studies due to the COIVD – 19 World pandemic.

In compliance with the above mentioned directive therefore, the Kilimanjaro Christian Medical University College (KCMUCO) compels all postgraduate students who were providing clinical service to Kilimanjaro Christian Medical Centre (KCMC) and Kilimanjaro Christian Research Institute (KCRI) to report back to their respective employers. This College directive also applies to all postgraduate students even if not employed by the MOHCDGEC.

The College management wishes to acknowledge, appreciate and indeed thank all postgraduate students who tirelessly and heroically continued to provide impeccable care service to clients and patients in KCMC during this trying period of the COVID – 19 pandemic. Any changes to the directive will be communicated to you through the available channels.

Let it be known that the College will continue engaging the postgraduate students through the Learning Content Management System (LCMS) and the Zoom video teleconferencing facility, to continue with the components of their studies which can be delivered online.

Sincerely yours,

Prof. Kien Alfred Mteta
Deputy Provost for Academic Affairs
